

## Beyond Advice: Creating Real Wins in the Real World.

### OUR DIFFERENCE

Leman Group isn't just a little different – we take pride in breaking many of the conventions of the consulting industry.

### Execution is Everything®

For us, success isn't about the report or the final presentation. Success is measured in only one way – delivering real results in the real world.

### Lean Execution®

We field small, high-powered teams – think SWAT team, not an army of consultants.

### Cookie-cutters are for cookies – not for your business.

The answers to your execution challenges are in your organization, not on a shelf in our office. We reject pre-fab solutions and tailor an approach that delivers the results you need in your world.

### Sustainability – your ongoing advantage

We drive change – and then weave it back seamlessly into your day-to-day business.

Our focus is execution. We drive big, one-time changes like M&A integrations, turnarounds, and other business transformation challenges for North America's leading organizations. We deliver high-stakes, must-win initiatives, often in tight timelines.

### OUR FIRM

We were founded over 25 years ago with one goal – to drive change that matters. Today, Leman Group is the foremost consulting firm specializing in execution. We have become the go-to partner for some of the world's leading organizations, from Fortune 100 global leaders to private equity firms and emerging, high growth companies.

### OUR WORK

We deliver outcomes, not just advice. Because our mission is to drive real wins in the real world – not just on PowerPoint decks. We work with clients on destiny-shaping initiatives like:

- M&A Integrations and Divestitures
- Turnarounds
- Strategy Execution
- Business Model Transformations
- Organizational Transformations
- Technology Implementations
- Outsourcing Executions
- Governance

Great strategies succeed – or fail – based on the quality of execution. Most organizations aren't short of good ideas – they need help bringing them to life. We have developed a unique understanding of how to successfully drive transformation – and weave it seamlessly back into day-to-day business.

### WHEN TO CALL US

When you want more than canned templates and boilerplate reports. When you want to make real change happen in the real world. When you cannot afford to fail. When you cannot accept any solution short of the right solution. When the stakes are high and things simply must get done. Our job is the same: to deliver the outcome you need.

### How does your organization measure success – good ideas, or great outcomes?

Think about your Top-5 priorities for the year – if one of them is an execution challenge, call us. We focus on the transformation, so you can focus on your business. Your team already has a day job – and driving execution is ours.
